WELLCOME

Presentation on
E-Commerce (online shopping)

What is E-Commerce

- Commonly known as Clothes Marketing.
- “It consists of buying and selling goods and services over an electronic systems Such as the Internet and other computer networks.”

Our System

- Our System is an e-commerce website from where people can buy products online.
- Admin monitors the activity of the users and checks the transactions.

Features:

- Menu
- Register
- Sing in
- Category
  - Category List
  - Product List
- Category Management
- Shopping Cart
- Checkout
- Dashboard

Languages:

- HTML
- CSS
- Bootstrap
- JavaScript
- Django
- Python
- MySQL

Tools:

- Visual Studio Code

ADVANTAGES OF E-COMMERCE

- Faster buying/selling procedure, as well as easy-to-find products.
- Buying/selling 24/7.
- More reach to customers, there are no theoretical geographic limitations.
- Low operational costs and better quality of services.
- No need for physical company set-ups.
- Easy to start and manage a business.

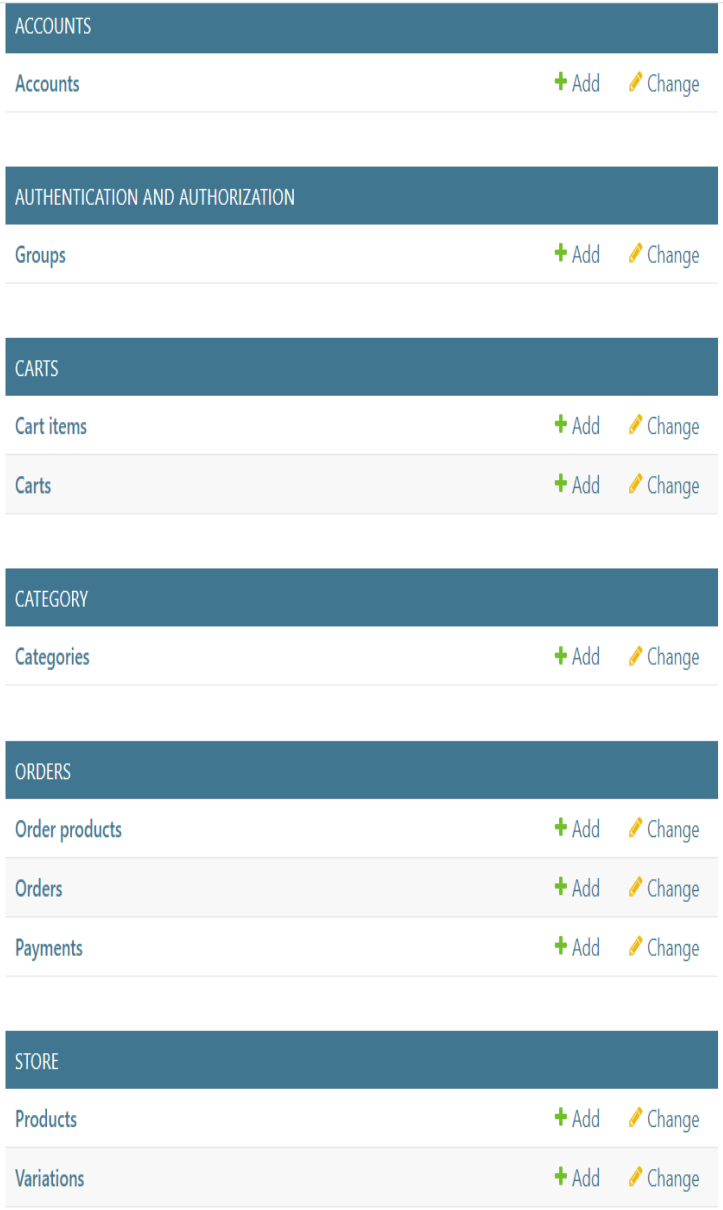
Admin Panel



The structure you've described seems to outline an admin panel interface for managing various aspects of an e-commerce platform or online store.

This admin panel provides comprehensive tools for managing various aspects of an online store:

- **Authentication and Authorization**: Controls who can access and perform actions within the admin panel.
- **Carts**: Manages customer shopping carts and items.
- **Categories**: Organizes products into logical groups for easier browsing.
- **Orders and Payments**: Handles customer orders from placement to fulfillment, including payment processing.
- **Store and Products**: Manages the product catalog, including details, variations, and inventory.

Flying Machine-jeans

$999

Listing the best jeans brands in India is one challenge. But picking out one name from the listicle has a difficulty of another level that can always confuse you.
